Introducing 30% smaller Power Inductors for High Frequency Applications

Shelton, CT. The Alpha-Core Division of Bridgeport Magnetics Group Inc. introduces high power inductors with minimum 30% size and weight reduction using gapped amorphous ribbon cores instead of cores of silicon steel or powdered iron.

Applications include switching mode power supplies, UPS systems, frequency inverters, solar and wind power systems.

For more information please visit www.alphacoredirect.com or call the factory sales department at 203-954-0050, toll free 800-836-5920 or email to sales@alphacoredirect.com.

Alpha-Core Inc. was founded in Bridgeport, CT by Ulrik Poulsen in 1982. In 2008 the company moved to its own 40,000 sq.ft modern plant in Shelton, CT and became a division of the newly formed Bridgeport Magnetics Group Inc. Tortran and Goertz Audio Products are two other divisions.
