Alpha-Core Introduces Power Cables for Pulsed Lasers

Shelton, CT. The Alpha-Core division of Bridgeport Magnetics Group Inc. introduces flat power cables for pulsed laser applications where laser diodes and power supplies must be physically separate and high power pulses are transmitted with extremely low impedance without distortion. Military applications include range finding, targeting and radar. Industrial uses are medical devices; metrology; ship navigation, machining, safety scanners, automobiles. BM Pulse Cable features low resistance and extremely low inductance to limit voltage drop and signal loss. Standard Characteristic impedance values include 4.0 Ohm, 2.5 Ohm, 1.7 Ohm and 1.0 Ohm. Prices start at \$3.00/foot. Factory stock.

For more information please visit www.alphacoredirect.com, or email to sales@bridgeportmagnetics.com or call 1800 836 5920.

Alpha-Core Inc. was founded in 1982 in Connecticut by Ulrik Poulsen. Bridgeport Magnetics Group Inc. was formed in 2008 and Alpha-Core and its sister company Tortran Inc. became divisions of the new company. Sandu Pescaru is co-owner and Vice President.
